

Chief Technological Officer / VP of engineering

ONEKA TECHNOLOGIES

Make the oceans the
most sustainable and
affordable source of
drinking water

Oneka Technologies, a growing company in Sherbrooke, Qc, whose mission is to make the oceans the most sustainable and affordable source of drinking water for coastal populations. To achieve this, the Oneka team developed technology to produce potable water by using the wave energy to desalinate seawater. This technology will enable coastal communities and industries to obtain potable water produced in an environmentally friendly and economical manner.
